

Technical Rapid Response Team

Tech RRT* Community Management of Acute Malnutrition (CMAM) Advisor

The Tech RRT* provides tailored support to individual organisations for Community Management of Acute Malnutrition (CMAM)

Does your organization need help building capacity in community management of acute malnutrition or want to increase program scope and coverage? Need help doing it?

Feel free to get in touch with the **Tech RRT** – we provide technical support to individual agencies (as well as to the collective, if needed). National or International organizations as well as health ministries can request our support. *Opportunities for financial support are available if necessary, thanks to USAID/OFDA, Irish Aid and SIDA!*

Examples of the kind of activities that the Tech RRT CMAM advisor can support are:

- Provide strategic advice and operational support on CMAM start-up, roll out or scale up
- Assess capacity in and provide support to implement CMAM or specific weak areas, for example care of infants under 6 months old
- Lead assessments or determine the need for CMAM establishment or scale up
- Facilitate rapid program start-up
- Provide support to improve the coordination of CMAM programmes
- Support to develop a CMAM strategy, mapping and guidelines, when necessary
- Assess CMAM capacity building needs of staff members or partners
- Facilitate trainings, Training of Trainers (TOTs), or orientation sessions
- Monitor CMAM activities and train supervisors in coaching and supportive supervision to improve program quality
- Brief donors and advocate for adequate resource allocation
- Review or lead the development of proposals and budgets to seek funding for CMAM

If you are working for an organization that needs support for CMAM programs, please request an advisor!

*The Tech RRT is a **partnership** between **International Medical Corps, Save the Children and Action Against Hunger** working in close **collaboration** with the **Global Nutrition Cluster (GNC)** and **UNICEF**, funded by **USAID/OFDA, Irish Aid and SIDA**. The goal of the Tech RRT is to improve and strengthen the technical quality of programs and assessments for improved nutrition outcomes of populations affected by emergencies and protracted crisis situations.
